

## 10 Reasons to Own a Swimming Pool

---

### 1. Quality Family Time

When you build a pool, you're creating a fun and relaxing space for your children and family to spend time together without ever leaving the backyard! You'll make lasting memories as there are no distractions such as TV and cell phones at the poolside: Only smiles, games, and the sound of laughter.

### 2. A Luxurious Lifestyle

Enjoy yourself, it's later than you think – Not only children, but you, too, deserve a swimming pool. A home is not complete without a pool that the kids can splash around in for hours during a hot sunny afternoon, or that adults can enjoy during an evening party. A pool will only improve the quality of your home, family time, and lifestyle.

### 3. Become Physically Fit

Instead of wasting time driving to a gym, you can use that time actually exercising in your own pool. Swimming is an excellent activity that is recommended for all levels of fitness. Because swimming is a low-impact activity, you can be sure that you're getting a great work out with minimum strain on your body.

### 4. Throw a Party

A birthday party for kids can be a hassle and exhausting, but when a pool is involved, it's memorable and worth the effort. Kids are not the only ones who enjoy pool parties; adults love to relax by the poolside and create stronger relationships and deeper friendships that will last for years to come.

### 5. Home Improvement Value

A pool adds to the value of your home and helps to position it as an estate. With a pool your home is no longer just average, but has joined the ranks of a higher level of living that will pique the interests of any future buyer.

### 6. Unwind and Relax

A pool is one of the most natural stress relievers in the world. When you get home from a busy day at work, take a dip in the pool. Whether you're splashing water with the kids, or doing a few peaceful laps by yourself, you will be able to feel the stress literally wash away.

## 7. Long Lasting Fun

A pool is an investment that all members of your family will love no matter what their age. Kids and adults will play games and linger for hours in the water, and with the proper care, your pool will be involved in the favorite memories of those you love for years to come.

## 8. Stay Cool in the Hot Summer Months

Sometimes the only way to cool down is to take a dip in a clean, cool pool. Installing your own swimming pool will insure that no matter what time of day, you'll be able to beat the heat without hiding out indoors.

## 9. Convenience

Instead of spending hours at the community pool or playground, with a pool you'll be able to keep an eye on kids while you get your work done. Feel like a dip before work? After a late-night phone call? The water is only a few steps away.

## 10. Investment

A pool is a physical reminder that family and fun is important. By installing a pool, you are making an investment for your family as well as in your property. Sunny afternoons will never be the same again.
